The City of Edmonton

Attention: Councillor Andrew Knack

Dear Sir:

As our community building is aging the required upgrades and general maintenance and repairs are becoming quite expensive and time consuming for volunteers. The last assessment of our facility was done in 2010 and this makes being proactive when it comes to budgeting for ongoing maintenance and major projects/repairs impossible.

Over the past year we have had several problems at the hall some of which include: roof repairs, a water line break; and a sewer line collapse (which extended under the building). These repairs have cost us approximately \$62,000.00, which has all but depleted our gaming funds. We are currently attempting to secure some emergency CLIP funding to assist as we are not eligible for a casino under March, 2024.

This letter is being provided in support of the request being made by EFCL to secure funding to have all League assets reviewed in depth over the course of the next three years, so they can assist us with planning and securing funding for needed repairs of the facility and equipment.

Yours truly,
MAYFIELD COMMUNITY LEAGUE
